Well-versed with JavaScript, React and Firebase services. Passionate about implementing and launching new projects. Also, I have solid grasp of programming languages coupled with knowledge of database, APIs and Cross-Platform App Development.

PROJECTS

Country Details
April 2022

Personal project, Data representation App

- A website to get knowledge about Country and Island. Users can surf to country details and can enhance their knowledge and see border country. Added filter and search functionality to enhance the accessibility of the website.
- Created a minimal & responsive UI and made efficient use of API using caching technique. Tried to implement DRY principal using custom hooks & reusable components.

Money Tracker
April 2022

Personal project

- A website to maintain daily transactions. User can edit transaction name and can delete one or all transactions.
- I used tools/technologies like **React-Redux.**

SKILLS

Languages: JavaScript, C++, HTML/CSS
